Coroplast® Cross-linked Laminated Foam

Coroplast® cross-linked laminated foam provides a combination of abrasion protection and extra cushioning protection for class “A” packaging applications.

Based on the samples tested, the results indicate good adhesive integrity throughout extreme temperature ranges.

As with all packaging applications, simulated transport testing should be conducted utilizing the actual packaging and parts to be protected. The configuration of the parts can play a significant role in the success or failure of protective packaging.

We believe the information contained in this bulletin to be correct and to the best of our knowledge and tests. The recommendations and suggestions contained herein are made without guarantee or representation as to the results. We recommend that adequate tests be made in your laboratory or plant to determine if this product meets all of your requirements.

Features & Benefits

- Made from polyolefin foam
- Soft cushioning properties
- Excellent for packaging and dunnage needs
- Non-abrasive for class “A” surface requirements
- Thickness: 1/32” to 1/8”
- Density: 4 to 6 lbs
- Width: 60”
- Color: Black

Coroplast has gone through an extensive material qualification and testing program to ensure the proper combination of process, materials, and adhesion levels is well suited for our customer’s packaging needs.
