Product Description

Corrugated Plastic - Coroplast is a lightweight, durable sheet consisting of three parts. The outside facings are manufactured to provide a highly printable graphic surface, while the inside core is produced with specifically arranged flutes to provide maximum strength with minimum weight. This provides a cost efficient, high quality board for your graphic needs.

What is Square Cut?

Coroplast offers a secondary process where the sheets are trimmed to a tighter tolerance. This is commonly referred to as Square Cut in the market. An example of a Square Cut tolerance would be $-0, +1/8$ " on the length and width for 4mm 24" x 18" sheets when ordered as Square Cut.
