

Coroplast® is the material of choice for today's printing industry. Coroplast® is ideal for indoor and outdoor applications. It is tougher than corrugated fiberboard, lighter than solid extruded plastic, waterproof, weather resistant and stain-resistant.

Coroplast® sheets, 2mm to 12mm, are treated with Corona Discharge on both sides to allow specifically formulated inks and adhesives to adhere.

We do not recommend UV printing on Coroplast® material that is less than 4mm in thickness.

Graphic sheets for printing applications have a 5,000 ft₂ per thickness, color, size and must run together.

Base Color for Graphics:
White

Standard Colors for Graphics:
Natural, Light Blue, Medium Blue, Dark Blue, Black, Brown and Yellow

Premium Colors for Graphics:
Red, Orange, Green, Silver, Ivory and Purple

Graphic extruded stock items:

Gauge	Product Specification	Product ID	Pallet Count
2MM	48" x 96" [c] White	RPA20WB150	550 per pallet
3MM	48" x 96" [c] White	RPA30WB382	350 per pallet
